# GRADING PROJECTS

## Jct of 3 Highways in Town of Penhold-Transformed into Roundabout

Project consisted of the removal of the four way intersection of three highways, and the construction of an efficient and safe Roundabout within Town limits.

Eagle worked with Central City Asphalt in the construction of a new Roundabout encompassing:

- \* Accommodation of heavy use traffic including wide loads from the farming industry.
- \* Redesign and safe access implemented for an established business in the NE Quadrant.
- \* Impacts to utilities and accommodation of nearby railway tracks.
- \* Environmental protection of ponds in both the NW and the SE Quadrants.

## Highway 817—Detailed engineering designs spanning over 17 years.

Construction spanned two seasons—2022 and 2023. Upgrades and revisions of over 10 kms of highway, including various connector roads and intersections in the Carseland Area.

Work on this project included:

- Realignment route studies and land acquisition, including legal surveys.
- Multifaceted utility coordination and relocations.
- Extensive environmental studies and Water Act coordination.
- Involvement of historical and paleontology resources.
- Coordination with Treaty 7 First Nation communities.
- Bridge demolition and installation coordination.
- 24 hr operations to allow for overnight paving.
