

Samples of our Work

SURFACING PROJECTS

Highway 2A—2024

This Pre-Overlay Surfacing preparation and paving job spanned the 20+ kms on Hwy 2A between the towns of Olds and Bowden. Eagle worked with Aecon Transportation and Alberta Transportation to place over 57,000 tonnes of asphalt as well as improving intersections within each of the two urban centers.

Highway 567—2023

Eagle worked with Aecon Transportation and Alberta Transportation to implement a pavement preservation overlay for over 18 kms on Hwys 567 and 772. Over 60,000 tonnes of Asphalt was placed, utilizing three Mix Types. These particular corridors provide movement for an abundance of heavy/wide loads, busy commuter traffic, and rider experience cyclists. All users factored into the overall surface design.

Highway 791—2024

Included in this paving project was extensive crack repair and side-slope improvements. Eagle's experienced team worked with Aecon Transportation and Alberta Transportation to successfully deliver successful completion, including three intersection radius improvements, in less than the anticipated site occupancy.
